**“...one of their operators compared the Bobcat S66 R-2 series compact skid-steer comfort to a luxurious Escalade. Another operator said it’s like a Denali.”**

(L to R) Joe Palfy, sales specialist for Bobcat of Toronto with Matt Ozorio and Dave Korkis owners of J&J Equipment Rentals who just took delivery of four new Bobcat machines.

J&J Equipment Rentals, family-owned and operated by Matt Ozorio and Dave Korkis, will be celebrating its one-year anniversary in March. J&J is named after both of their sons, Joseph and Jacob. They have a branch in North York and Caledon East but cater to the whole GTA and surrounding areas.

When they were asked what sets them apart from the other rental companies, their answer was “we are available 24/7 for our customers. When they call, they get us. We bring the equipment right to them, on time and we even work weekends. Not many do. We offer our customers new equipment because you can’t put a price on comfort and reliability,” stated Matt and Dave.

In less than one year, they have bought eight new Bobcat® machines. Matt explained they went to different dealers first to make sure they did their due diligence, but the innovation was with Bobcat machines and the best customer service was with Joe Palfy, sales specialist with Bobcat of Toronto, so that is where we purchased their machines. “Joe was straight with us and is very passionate about what he does. He didn’t push us. He has never steered us wrong and has been true to his word. I talk more to Joe now than anyone,” said Matt.

“We have nothing but positive feedback from our customers on the Bobcat machines. A few have even wanted to buy them, especially the Bobcat S66 compact skid-steer R2 series. Our goal is to have a huge fleet of the R2 series. The customers absolutely love the extra comfort and added options like the heated seat, air conditioning, etc. on them. One of our customers said one of their operators compared the Bobcat S66 R-2 series compact skid-steer comfort to a luxurious Escalade. Another operator said it’s like a Denali. The operators

fight who gets to use it when they start work in the morning.

“We shifted our focus on heavy equipment more so on the landscaping, residential homes, waterproofing, pool installing, concrete contractor side as they are so busy. We need to make sure we have equipment in for them,” stated Matt.

“Bobcat machines, Joe Palfy and Bobcat of Toronto have all been reliable and have helped our business grow substantially in the last year. We wouldn’t hesitate to recommend them”, stated both Matt and Dave.

Thank you Matt and Dave.
