"They make the machines second to none."

(L to R) Enzo Forletta, equipment/yard manager for Eastern Construction and Stu Johnson, sales specialist for Bobcat of Toronto/Oaken Equipment, at one of Eastern Construction's current jobsites where they are building a new police headquarters in Brampton.

Eastern Construction is a General Contractor based out of the Greater Toronto Area. Eastern Construction was established in 1951 and is one of Canada's most respected employee-owned construction companies. Eastern Construction takes pride in its reputation for thinking forward and rising above after seven decades of completing 1000+ significant projects.

Enzo Forletta, equipment/yard manager for Eastern Construction, has been with the company for 15 years. When he was asked why they chose Bobcat® machines for the compact equipment, he replied, "It's my opinion that they have the better machines. Also, for all their attachments and for the service support I get from Stuart 'Stu' Johnson, sales specialist, Bobcat of Toronto/Oaken Equipment. I love the smoothness more than anything when operating the Bobcat machines, which makes them more controllable and durable. They make the machines second to none. They move forward

so they don't get left behind. Everyone calls a skid-steer/track loader a Bobcat."

"Stu Johnson always calls me back and took good care of me on our newest purchase, a Bobcat T740 compact track loader. I am very meticulous about our machines. I make sure our operators take great care of them by keeping them clean and maintained. We have machines 20+ years in the yard and they are still in great condition. The resale value on the Bobcat machines is better as well. You get what you pay for. On the Bobcat machines, you get chrome rods, and their cylinders have patents on them. Some other machines are using cheaper parts."

"The applications we use the Bobcat machines for on our sites are for site prep, clean up and some street sweeping. We went with the Bobcat track loaders for the mud at new sites. It's much easier and faster to get through

mud, and for flotation purposes, it's easier."

"I have been working with Stuart Johnson, Bobcat of Toronto since 2011, and I wouldn't hesitate to recommend him, Bobcat of Toronto/Oaken Equipment and Bobcat machines for your next compact machine purchases and attachments."

Thank you, Enzo.
