“Bobcat. They are good machines with smooth hydraulics, they are very reliable and dependable.”

(L to R) Robert Lopez, landscape manager and Jon Cooney, sales associate for Ambassador Building Maintenance Ltd. and Braedon Lansue, sales specialist for Bobcat of Windsor/Oaken Equipment with Ambassador’s newest snow fleet.

For over 64 years, Ambassador Building Maintenance Ltd. has built its reputation on providing first-rate janitorial cleaning services and building maintenance for industrial, commercial, institutional, health care, and private sectors, 7 days a week/24 hours a day, throughout Ontario. They are a proud third-generation run company. Bill and Karl Taylor have grown the company by adding a security division seven years ago and a full landscape design with both hardscape and softscape landscaping and snow removal division two years ago to service the Windsor area.

The landscaping and snow removal division has led them to purchase all-new equipment from Braedon Lansue, sales specialist for Bobcat of Windsor, including two Bobcat® L95 compact wheel loaders, a Bobcat UW56 Toolcat utility work machine, a Bobcat CT5558 compact tractor, five snow raiders and all new plows and salt spreaders on their trucks as well. They purchased Bobcat ZT6000 and T3500 zero-turn mowers for

lawn cutting and are looking to purchase a walk-behind commercial Bobcat mower for next season. The walk-behind mowers are great for slopes, and we are all about safety,” stated Robert.

Ambassador Building Maintenance hired Jon Cooney, sales associate, as he previously ran a landscaping/snow removal company, along with Robert Lopez, landscape manager, together with 35 years of experience, to head the landscaping/snow removal division.

When Jon and Robert were asked what they liked about Bobcat machines, Jon replied, “They are good machines with smooth hydraulics, they are very reliable and dependable. Very important in our line of work. We depend on machines 24 hours a day, 7 days a week. Bobcat of Windsor is centrally located. Anything we need, we get it done right away.” Robert adds, “Bobcat technology is very advanced compared to other brands. They are easy to operate. Other brands, for example, is hard to change a belt, but on a Bobcat machine, you can do it quickly and right on site!”

They use the Toolcat for moving materials around in the shop, moving pallets, carrying chemicals/pesticides/sprays, and loading dump trailers with gravel and rock. The Bobcat CT5558 compact tractor is used for field cutting with the Bobcat Brushcat™ rotary cutter attachment and snow removal. The Bobcat L95 compact wheel loaders are brand new, and they will be used for commercial plaza snow removal.

Jon Cooney has been working with Braedon Lansue since he was 15 years old. “You keep your circle small. Work with people you trust. I trust both Braedon and his father, Brian. Brian is known in Windsor for being the snowplow guy; they both know the snow business. We went to Bobcat because of them. Braedon has been professional to work with. His knowledge surpasses the average normal person.” Robert adds, “Braedon is always available. With other people, you can call for weeks and no calls back. He is very knowledgeable. Both Jon and Robert agree, “we would recommend Braedon Lansue and using Bobcat of Windsor for your next purchase.”

Thank you, Jon and Robert.
