

COMPACT EQUIPMENT TIRES

PNEUMATIC LOADER TIRES

Standard-Duty Loader Tires

Designed for maximum traction and grip, the center lug of the Bobcat® standard-duty tire adds extra traction. These tires are created for long wear during normal machine-hour applications, such as agriculture, rental, landscaping and general construction. The special rim guard and thick sidewalls provide outstanding protection against punctures. They're constructed with a unique blend of natural and synthetic rubber.

- **Durable tread compound** prevents downtime and increases productivity
- **Extra-heavy sidewall** provides superior damage and puncture resistance
- **Special rim guard** protects the tire and wheel
- **Industry-leading tread depth** provides superior traction from high void-to-lug ratio

Heavy-Duty Loader Tires

Bobcat heavy-duty tires increase protection against punctures and cracks with extra-thick sidewalls. They feature bead guards to shield against rim and sidewall punctures. The combination of superior self-cleaning rubber and a high ply rating makes these tires ideal for rough, high-hour applications such as rental, construction, landscaping and industrial jobs.

- **Durable sidewall and rim shield protector** provide high resistance to flats and punctures
- **Proven tread compound** is wear-resistant to protect from chunking and separation
- **Special bead guard** offers great tire and rim protection
- **Superior tread design** offers three-step self-cleaning and excellent traction

Severe-Duty Loader Tires

When your job demands an aggressive, long-lasting tread, choose the Bobcat severe-duty tire. It's designed to take on more abuse than a conventional tire and provide superior self-cleaning characteristics.

The deep tread depth significantly increases service life while reducing downtime from cuts and punctures. Bobcat severe-duty tires are proven performers in construction, recycling, industrial, rental and other tough applications.

- **Unique tread pattern** operates in severe applications and provides excellent self-cleaning qualities
- **High ply ratings** increase service life while reducing downtime due to cuts and punctures
- **Sixty-eight percent solid-to-void tread ratio** performs well on aggressive surfaces
- **Strong sidewall protection** provides extraordinary hours of service and reduces downtime

Severe-Duty All-Terrain Loader Tires

A non-directional tire with an aggressive, extra-deep tread and wide sidewall that provides superior impact resistance. This tire features a large footprint with a massive lug-to-void ratio. It has a zig-zag tread pattern for optimal traction and handling on mixed surfaces and in severe-duty applications.

- **Tread depth** is perfect for severe applications
- **Stepped tread design** provides excellent cleanout for improved traction
- **Superior sidewall protection** provides exceptional hours of service and minimal downtime
- **High ply ratings** increase service life while reducing downtime due to cuts and punctures

Turf and Sand Loader Tires

Maintain your lush lawn by using Bobcat turf and sand tires on your next job. While other tires may gouge into and damage lawns, this tire is engineered to provide superior flotation characteristics to minimize harm and still offer excellent traction. These turf-friendly tires will not damage grass or roots, and they are great in applications such as golf courses, sugar sand, nurseries, sports grounds and cemeteries.

- **Specially designed tread** engineered to be extra ground conscious
- **Wide sidewalls** provide extra flotation on grass and sand
- **Flat profile and specially designed tread** for maximum traction and maximum flotation
- **Durable tread compound** for long life

Super-Float Loader Tires

The super-wide tread and sidewalls of super-float tires are designed to perform in soft or wet soil conditions. Super-float tires eliminate the need for an expensive and cumbersome track system. If your job requires extra flotation, super-float tires will keep you moving in applications including parks, cemeteries, golf courses, nurseries, beaches and compost yards.

- **Eighty-five percent more footprint** for turf protection
- **Low and even pressure distribution** for minimal ground disturbance
- **Super-wide sidewalls** provide extra flotation in soft or wet soil
- **Durable tread compound** for long life

Snow Tires

“Tough, versatile and agile” perfectly describes Bobcat snow tires. The narrow base provides the power and traction you require in harsh winter conditions without the need for studs, making the Bobcat snow tire the ultimate tire on ice and snow.

- **Narrow base** for extra stability and traction
- **Unique tread** designed for increased power and grip on snow and ice
- **Special cold weather compound** that remains flexible in colder temperatures
- **Load rating** designed for your Bobcat equipment

WHERE THE RUBBER HITS THE ROAD

Choosing the best tire is important for machine traction, flotation, wear and overall performance. Tires with the correct height, width and ply rating for your equipment will maintain proper operating efficiency and ensure support of maximum loads. Depend on genuine Bobcat tires for performance, reliability and superior results in all of your tough jobs.

SOLID LOADER TIRES

Solid Flex Tires

- **Built for long life** in daily applications requiring a solid tire
- **Durable tread compound** for long life and decreased downtime and maintenance
- **Specifically engineered sidewalls and apertures** that prevent cutting and snagging and provide improved comfort
- **Non-marking orange tread option** is ideal when no marking is wanted on hard surfaces

SOLID LOADER TIRES

Solid Severe-Duty Non-Directional Loader Tires

- **Tread depth** is ideal for severe applications
- **Aggressive non-directional unique tread design** allows tire to be interchangeable from left or right on your loader
- **Sidewall aperture design** provides improved rider comfort
- **Durable tread compound** improves ride quality and reduces cracking

Solid Super Smooth Loader Tires

- **Sidewall aperture design** provides improved rider quality and comfort
- **Specifically engineered sidewalls** that prevent cutting and snagging
- **Built for long life** in daily applications requiring a solid tire
- **Durable tread compound** for long life and decreased downtime and maintenance

ARTICULATING TRACTOR TIRES

The articulating tractor tire is designed with an open non-directional tread pattern, which provides great traction and superior wear characteristics on a variety of surfaces. The tread's wide footprint and high rubber-to-void ratio provides excellent stability, puncture resistance, wear resistance and long tire life.

TIRE	MODEL	PART NO.	OUTSIDE DIAMETER	TIRE WIDTH	RIM DIAMETER	PLY RATING	MAX. LOAD	TIRE WEIGHT
Standard	AT450	4167168-01	20.6 in. (523 mm)	11.2 in. (284.5 mm)	10 in. (254 mm)	6	1345 lb.	22.8 lb. (10.3 kg)

COMPACT TRACTOR TIRES

Agricultural Tires

Agricultural tires feature deep lugs for optimal traction and self-cleaning in soft soil and mud. They deliver more power to the ground when towing heavy loads or pulling implements.

Industrial Tires

Designed for maximum traction and versatility for a wide range of applications, industrial tires provide long wear and outstanding protection against punctures. With wider tread than agricultural tires and deeper lugs than turf tires, industrial tires keep operators moving in all ground conditions.

Turf Tires

Turf tires offer excellent traction while minimizing damage and repairs to lawns and finished surfaces.

COMPACT WHEEL LOADER TIRES

The Bobcat compact wheel loader (CWL) versatile block tread design enables high performances on snow-covered or sandy terrains. The tread pattern is an optimized on/off road pattern with shoulder lugs for traction in the fields, and the basic directional lug design, divided by separated blocks, provides a good grip on soft surfaces. In addition, the high number of blocks and rubber-to-void tread ratio enable long tread wear life and low rolling resistances during transport operation on hard surfaces. Uniform ground pressure distribution and tread wear are provided by a steel-belted carcass structure, which provides the most efficient puncture protection.

SMALL ARTICULATED LOADER TIRES

Standard Tires

Standard tires give you good traction for a variety of challenging jobs.

Tractor Tires

Tractor tires give you a more aggressive tread that powers your machine through soft or wet ground.

Turf Tires

Turf tires provide the best combination of smooth maneuverability and turf-friendly traction for sensitive ground.

TOOLCAT UTILITY WORK MACHINE TIRES

Float Tires

The wide sidewalls of the float tires are designed to perform in soft or wet soil conditions.

Shown on machine to the right.

Standard Tires

These versatile tires perform great in a variety of applications.

Turf Tires

Turf tires protect the ground from damage during landscaping jobs.

Snow Tires

Snow tires provide the power and traction required in harsh winter conditions.

UTILITY VEHICLE TIRES

All-Terrain

Keep moving in soft and wet soil conditions with Bobcat mud tires. This tire provides good float, aggressive and wide tread, and increased durability.

All-Season

Aggressive staggered block pattern improves surface contact and helps with soft and uneven terrain traction, boosting driver control. It effectively self-cleans rocks stuck between the tread and eliminates mud and snow to prevent them from blocking surface contact.

Shown on machine to the right.

General Purpose

Great tread depth and more rubber on the contact surface provide increased traction, improved puncture resistance and longer tire life. The shoulder design minimizes turf damage.

Mud

Durable in extreme conditions with heavy loads, these tires provide confidence in deep mud. Aggressive tread patterns are designed for any trail, whether in the woods or the desert.
