"I LIKE BEING IN A BOBCAT MACHINE MORE THAN BEING IN THE OFFICE."

David Zeppieri, Paul Campisi, Stu Johnson, sales specialist for Bobcat of Toronto/Oaken Equipment, Steve Grasso and Roby Rizzi, from Alfa Construction Equipment Rentals with their delivery of 22 new Bobcat machines.

Steve Grasso, David Zeppieri, Danny Zeppieri, and Roby Rizzi have known each other for a long time working together in the same industry. During Covid, they saw a need for the rental market. "Finding any standard equipment or a Bobcat machine during that time was tough. They were either taken or didn't have any at all," stated David Zeppieri. That is when the four came together, and Alfa Construction Equipment Rentals opened their doors, offering a vast inventory of rentals from small tools to heavy equipment, both gas and electric. You can rent it all. Alfa's commitment is to customer satisfaction. You are dealing with a small team that is very hands-on and will go the extra mile for their customer. They are based in Stouffville but service the GTA and will go as far as the Halton/Hamilton area.

When David was asked why they had just bought 22 new Bobcat® machines, he responded, "We wanted to be well prepared to service the market, our customers." Why Bobcat? "Quality of machinery, a very respected brand. Also, the service aspect, support from Bobcat of Toronto (Oaken Equipment), reliability of the machines, and they have many models to choose from. Kai Sørensen and his sales team, including Stuart Johnson, really came through for us. Stu Johnson has been great to work with. Extremely knowledgeable. We like to partner with someone with values similar to ours. We bought Bobcat mini excavators, compact skid-steers, compact track loaders, and various attachments through Bobcat of Toronto. We will also be purchasing portable power through them. We also know that they always have

a huge inventory in stock if we ever need anything in a pinch."

Roby Rizzi, also operates machines. When asked what he likes about operating Bobcat machines, he responded, "Bobcat machines are very comfortable; visibility is great all around, which makes safety superior to other machines, and they are a smooth ride. I like being in a Bobcat machine more than being in the office," he chuckles.

"We wouldn't hesitate to recommend Stu Johnson, Kai Sørensen and the Bobcat of Toronto (Oaken Equipment) team to purchase your next machines and attachments," agreed by the owners of Alfa Construction Equipment Rentals.

Thank you, David, Roby, Steve and Danny.
