"BOBCAT machines are just built for what we do."

(L to R), Todd Gill, sales specialist for Bobcat of Toronto (Oaken Equipment) and Mickey Sudar, owner of Quality Plus Grounds Care Ltd.

Stone to Snow, Bobcat Machines Never Slow

Founded in 1994, Quality Plus Grounds Care Ltd. has built its reputation on detail, reliability, and long-term relationships with clients. Specializing in soft landscaping and year-round maintenance for large residential complexes and commercial sites, owner Mickey Sudar takes pride in delivering work that consistently looks superior. Even at sixteen, his passion and skill for landscaping were clear, earning him a promotion to foreman.

"People are paying good money; they deserve to see quality results. I

like to walk away from a site and say, 'That looks really good.' That's where our name comes from."

Based in Mississauga, the company keeps its focus close to home. With 12 large properties under care year-round, snow and ice control is a significant part of the business. That's where Bobcat® equipment comes in.

"For my sites, a truck and plow just won't cut it. With the Bobcat S76 and S650 compact skid-steer machines, I can access tight spaces, utilize snow buckets, and deliver the details my properties require. In the summer, we use them for everything from removing lawns, hauling soil, installing armour stone, moving rocks, mulching, planting, you name it."

When asked why he chooses Bobcat: "Honestly, they're sexy machines. They look sharp, they're comfortable, powerful, easy to operate, have great visibility, and I've never had an issue starting them in winter. Reliability is everything. You don't go to Ford to get a truck if you are a GM guy. You stick with what works. Bobcat machines are just built for what we do." I've been working with Todd Gill, sales specialist at Bobcat of Toronto

(Oaken Equipment), for nine years now. He's been fantastic to work with; I wouldn't keep going back to him otherwise.

With a growing crew and plans to expand, Quality Plus Grounds Care is aiming to add more Bobcats to the fleet. "I'd love to have four or five of these lined up one day. They've been a huge part of our success, and as we grow, Bobcat will definitely grow with us."
